

Catch every overcharge, missing POD and stuck shipment

NeodyAI for Transport & logistics · Carriers, freight forwarders, 3PLs, couriers

Where the time goes in transport and logistics

Freight invoices unchecked

Carrier bills are paid without matching them to rates and accessorials.

Billing waits on PODs

Proof of delivery is matched to loads by hand before you can invoice.

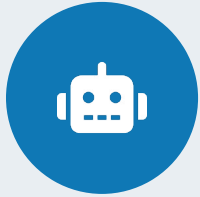

Exceptions found late

Delays, damages and customs holds surface after the customer calls.

NeodyAI takes on this work with AI that prepares, checks and chases, while your people decide.

AI does the work. Your team stays in control.

AI does the work

Reads documents, checks them against your rules, drafts and follows up across the systems you already use.

Your people decide

It runs beside your team first. Autonomy is earned on measured agreement, and taken back automatically when quality drops.

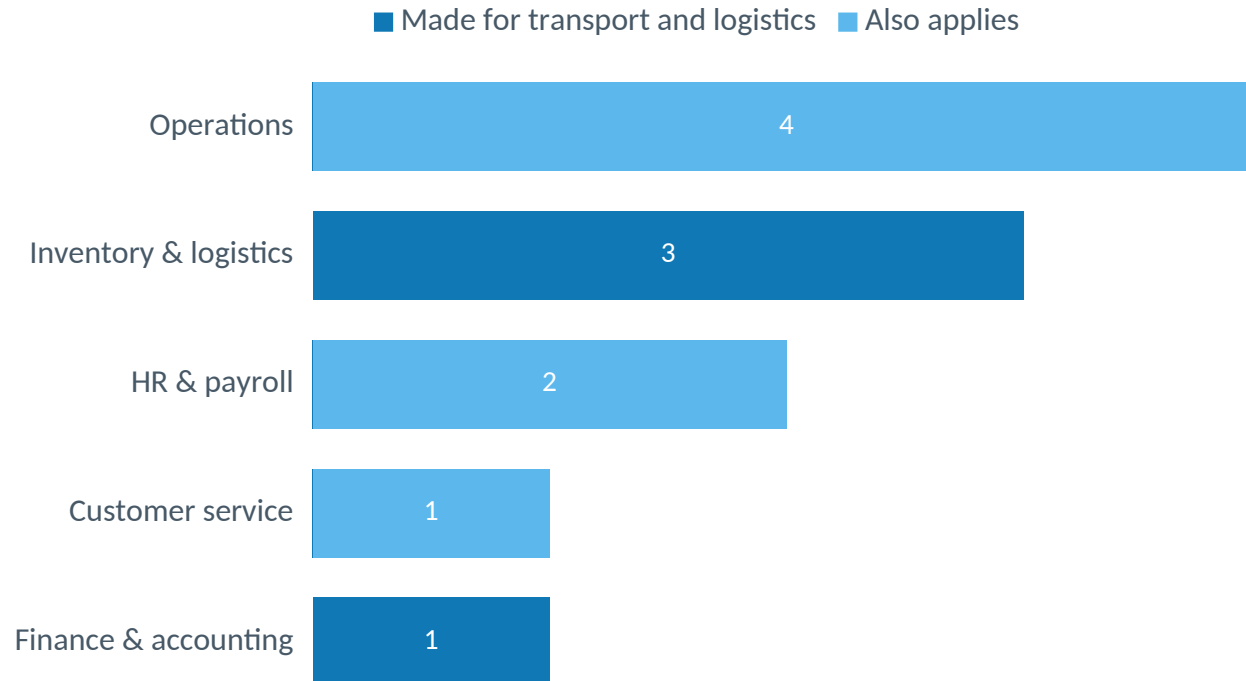

Your data stays protected

Sensitive fields are protected before any model sees them, and every action is on the record.

11 use cases for transport and logistics

Use cases by department

made for transport and logistics

1

high value at low or medium effort

1

ready to run or start from a template

Every use case is on a card in the appendix.

Where we'd start

1

FINANCE & ACCOUNTING

Freight invoice audit

Carrier invoices checked against rates, accessorials and the shipment; overcharges disputed.

Intake & extract → Validate → Consolidate

Value high · effort medium · Guide

2

INVENTORY & LOGISTICS

Proof-of-delivery matching

PODs read and matched to loads and invoices so billing isn't held up.

Intake & extract → Consolidate

Value medium · effort medium · Guide

3

INVENTORY & LOGISTICS

Shipping & customs documents

Commercial invoices, packing lists and certificates checked before the shipment leaves.

Intake & extract → Validate

The work AI takes on

5

Intake & extract

Reads emails, PDFs and forms

4

Follow up

Chases people until the gap is closed

4

Validate

Checks documents and data against your rules

3

Consolidate

Pulls sources together and matches them

3

Monitor & alert

Watches and flags what needs attention

2

Draft

Writes the first version for a person to edit

Your sensitive data stays protected

How to get started

01

Try the free workflows

Run sample processes free, including one on protected sample data

02

Pick your first use case

We'd suggest Freight invoice audit, or the pain that costs you most

03

Run it beside your team

Nothing is applied until your people agree with its work

04

Add the next one

The second use case is faster: connections and approvals already exist
