

Less admin, more time on the floor

NeodyAI for Restaurants & food service · Restaurants, cafés, caterers

Where the time goes in restaurants

Food costs move, menus don't

Ingredient prices change weekly while menu prices stay the same.

Reviews go unanswered

Guests post online and nobody has time to reply well.

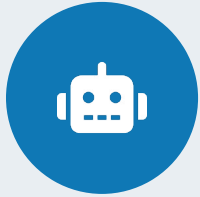

Logs and timesheets on paper

Food-safety logs and staff hours are checked by hand, if at all.

NeodyAI takes on this work with AI that prepares, checks and chases, while your people decide.

AI does the work. Your team stays in control.

AI does the work

Reads documents, checks them against your rules, drafts and follows up across the systems you already use.

Your people decide

It runs beside your team first. Autonomy is earned on measured agreement, and taken back automatically when quality drops.

Your data stays protected

Sensitive fields are protected before any model sees them, and every action is on the record.

15 use cases for restaurants

Use cases by department

Every use case is on a card in the appendix.

Where we'd start

CUSTOMER SERVICE

Online review replies

Replies to online reviews drafted in your voice for a quick approve.

Draft

Value medium · effort low · Guide

OPERATIONS

Menu costing

Plate costs recalculated as supplier prices change; dishes whose margin slipped flagged.

Consolidate → Analyse history

Value medium · effort medium · Guide

QUALITY

Food-safety logs

Temperature, cleaning and allergen records checked as they are made; misses alerted.

Intake & extract → Validate → Monitor & alert

Value medium · effort medium · Guide

The work AI takes on

6

Consolidate

Pulls sources together and matches them

6

Intake & extract

Reads emails, PDFs and forms

5

Validate

Checks documents and data against your rules

3

Analyse history

Finds patterns in past activity

3

Draft

Writes the first version for a person to edit

2

Execute

Takes the approved action in your system

Your sensitive data stays protected

Sensitive data these use cases touch

Personal information

1

Trade secrets

1

Rules they fall under

Food safety codes · 1

Your team approves until the AI has earned more

Moves up on evidence: enough decisions, high agreement with your people, an approver who didn't build it

Steps back automatically: when quality drifts, an incident fires, or the AI model changes

Works with the systems you already use

How to get started

01

Try the free workflows

Run sample processes free, including one on protected sample data

02

Pick your first use case

We'd suggest Online review replies, or the pain that costs you most

03

Run it beside your team

Nothing is applied until your people agree with its work

04

Add the next one

The second use case is faster: connections and approvals already exist

Use cases made for restaurants

OPERATIONS

Low risk

Menu costing

Plate costs recalculated as supplier prices change; dishes whose margin slipped flagged.
